

Rock Cycle Story - Description:

In 250-300 words, I would like you to describe the processes that rocks / earth materials go through in order to progress through the different stages of the rock cycle.

You can directly describe these steps / processes, or you can create a story (with pictures if you like) to illustrate these changes.

	Sedimentary	Igneous	Metamorphic
Sedimentary	Weathering Sediments Lithification	Melting Cooling / Crystallization	Heat and Pressure Recrystallization "Baked"
Igneous	Weathering Sediments Lithification	Melting Cooling / Crystallization	Heat and Pressure Recrystallization "Baked"
Metamorphic	Weathering Sediments Lithification	Melting Cooling / Crystallization	Heat and Pressure Recrystallization "Baked"
